PROFILE

I sell complex SaaS to German industrial groups, and I have sat on the other side of the table long enough to know how they decide.

25 years in the DACH market. The last 10 closing multi-year subscription deals with Tier 1 manufacturers, the 14 before that running supply chain delivery and consulting teams at Esprit, Toshiba, UPS and Accenture. At Blue Yonder I own a discrete manufacturing territory of DAX and Mittelstand groups in automotive, steel, sensors, building materials and aluminium. FY25 ended at 239% of quota and a Rocketship Club award. Since 2023 I build with AI in my own time: a private RAG on Qdrant, pipelines written with Claude Code, agent workflows on N8N and MCP, all on a server in my home office. I can demo without a sales engineer in the room.

EXPERIENCE

MAY 2023
TO PRESENT
Remote, DACH
Karlsruhe HQ

Senior Account Executive

Blue Yonder · EMEA Sales, Discrete Manufacturing (formerly JDA Software)

- ◆ Own a DACH book of 5 Tier 1 industrial accounts (automotive, steel, sensors, building materials, aluminium), earlier also pharma and semiconductors. Full cycle from outbound to signature, renewal and expansion.
- ◆ **Sensor and automation group, Q4 2025:** turned a strained relationship into an early renewal, closed as a 5-year SaaS agreement with a high 6-figure ACV upsell and about EUR 8M TCV. Rebuilt trust through a joint value blueprint, then orchestrated 20+ contributors across services, legal, pricing and presales.
- ◆ **Pharma and chemicals group, mid 2025:** moved a legacy on-premise planning estate to SaaS on a 5-year term at about EUR 1M a year. Negotiated ramp, sandbox scope and 5-year services rates with the customer and HQ.
- ◆ **Building materials group, 2024 to 2026:** from a paid blueprint to a signed cloud subscription agreement and a planning transformation SOW. Opened the US business unit at VP and supply chain leadership level.
- ◆ **Industrial conglomerate, since late 2025:** appointed account executive for the group. Running the retention of an automotive subsidiary with an executive business review and a multi-year, multi-plant repricing model, plus an active planning tender at the steel division.
- ◆ **Global tire manufacturer:** renewed the 2026 term of a worldwide planning contract (high 6-figure annual value), settled an indexation dispute, now positioning the on-premise to SaaS conversion.
- ◆ Quota trajectory FY23 50% (ramp), FY24 90%, **FY25 239%**, Rocketship Club FY25.

Accenture · Toshiba EMEA · UPS Supply Chain Solutions

- ◆ Manager, Management Consulting (fulfilment) at Accenture. EMEA SCM specialist at Toshiba: strategic SCM initiatives and 3PL negotiations. UPS SCS: EMEA after-sales operations for Dell, IBM and HP.

JUL 1999
TO MAR 2001
Germany

IT Project Manager

CAT Group · Renault vehicle logistics

- ◆ IT projects and change requests for the German operations, TMS subject matter expert, EDI onboarding of new customers (Volvo, Kawasaki).

BUILT, NOT BOUGHT

Since 2023, AI as a working tool on my own hardware, outside working hours. Not a certificate, a running system.

- ◆ Private RAG on Qdrant and FastAPI over 20 years of emails, contracts and scans, queried from Claude Code through MCP.
- ◆ Agent workflows on N8N: account intelligence, deal-desk prep, market watch with Telegram alerts.
- ◆ Docling ingestion, local models on Docker, custom MCP servers in Python.
- ◆ Used daily for account planning, white-space analysis and QBR decks. Preparation time on complex deals cut by more than half.
